[p. 293-300]. (Abstract available)

DESCRIPTORS: *Paper, Moisture, Tensile properties,
Hysteresis, Manufacturing methods,

The moisture absorbed by paper from the atmosphere is dependent on the type of fibre used and also on the method of beating and drying; varies considerably at different r. h. levels and temperatures. At r. h. levels above 70% the moisture absorption of paper begins to rise steeply. In comparing the water content of paper in an atmosphere of both increasing and decreasing moisture content one can clearly observe the appearance of hysteresis phenomenon. It is difficult to ob-
